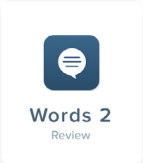
Legend

Exercise

The exercises gradually introduce new keys.

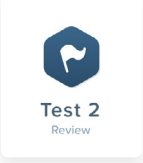


Words

This type of activity uses words composed solely of letters already practiced in the exercises.

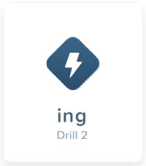
Texts

Typing Pal texts include words and complete sentences. Their themes and levels of difficulty are adapted to the students' age.



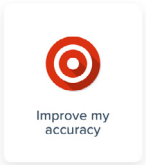
Tests at the end of each step

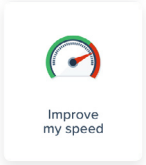
The tests recap all the keys introduced in the step just completed.



Drills

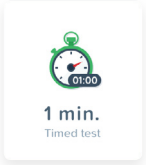
In these activities, students type some of the most common character sequences in English multiple times.

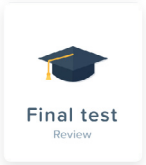




Improvement

The improvement activities are automatically generated by Typing Pal's algorithm, which analyzes the student's typing and detects which characters or fingers need more practice.





Final tests

As for the tests at the end of the Final step, they consist entirely of texts. The timed tests have a time limit. If the student passes the final test, he or she will obtain a personalized certificate that highlights this achievement.

Activity statuses

Activity completed perfectly (objectives achieved, no errors)

Activity completed successfully (objectives achieved)

Activity to be completed
